Calendar Module Settings:

With an up-to-date interface and informative calendar, you can see your employees' schedules. You can filter appointments based on the location, services, and staff as well. Google Calendar events also appear on **Rainbow Booking** Calendar. In the appointments added with Google Calendar, there is a Google Calendar icon.

The color of the event also can be displayed on the Rainbow Booking Calendar. It works with the Live sync method and changing events on Google Calendar are instantly updated and reflects on the Rainbow Booking Calendar.

You can show the appointments monthly, weekly, or daily, and also view appointments in the list view through the List view option.
